GUANXIONG CHEN

B.A.Sc. Student · Computer Engineering

University of British Columbia

chenguanxiong@alumni.ubc.ca | www.guanxiongchen.com | https://github.com/ericchen321

Education

University of British Columbia *Vancouver, BC, Canada*

Bachelor of Applied Science in Computer Engineering *September 2015 - Present*

- GPA: 89%

Research Experience

VCR (Verification, Control, Robotics) Group, University of British Columbia *Vancouver, BC*

Advisor: Prof. Ian Mitchell *May 2020 - Present*

- Completed literature review on paper "Habitat: A Platform for Embodied AI Research"
- Building an interface between ROS and Habitat AI framework
- Investigating physics effects in Habitat Sim simulator

SPIN (Sensory, Perception and Interaction) Group, University of British Columbia *Vancouver, BC*

Co-Advisors: Dr. Soheil Kianzad, Prof. Karon MacLean *Sept. 2019 - Present*

- Working on paper: "Haptic Geometric Relationships in Physical Drawing" (working title)
- Completed literature review of papers on sketching and haptic pen
- Wrote Python code to allow users define geometric relations between objects in CAD sketches drawn with a haptic pen
- Designed experiments for the user study

RESESS (Reliable, Secure, and Sustainable Software) Lab, University of British Columbia) *Vancouver, BC*

Co-Advisors: Mr. Michael Cao, Prof. Julia Rubin *May 2019 - Aug. 2019*

- Analyzed malware samples from Google Play store
- Ran DroidNative (a ML-based malware detection tool) on Android app samples
- Preprocessed and extracted features from apps for training in DroidNative
- Wrote Python scripts to automate experiment deployment on remote servers

Coursework and Personal Projects

The Animated Racoon

Coursework for cpsc 314: Computer Graphics *Oct. 2020*

- Wrote code in JavaScript and GLSL to render various effects for an animated racoon

Jack in a Box (A Blackjack Game Machine)

Coursework for cpen 391: Computer Engineering Design Studio II *Mar. 2020*

- Implemented a ML-based image recognition pipeline on a Raspberry Pi to recognize poker cards' face values
- Collected and preprocessed data for training and testing
- Implemented with a teammate the game's mechanics in a bare-metal program targeted for an ARM processor

OS/161 Virtual Memory System

Coursework for cpen 331: Operating Systems *Dec. 2019*

- Implemented a virtual memory system with a core map, per-process page tables, related system calls on a teaching operating system (OS/161) in a team of two

Simple Image Processing SoC

Coursework for cpen 311: Digital Systems Design *Mar. 2018*

- Implemented independently an accelerator used for accelerating affine rotations of 2D images on a FPGA chip
- Built the system with EDA tools from basic blocks - a soft-core CPU, memories, and the accelerator
- Wrote code in C to evaluate the accelerator's speed-up

Awards, Fellowships, & Grants

NSERC Undergraduate Student Research Award
Natural Sciences and Engineering Research Council *2019*
- The award intends to develop Canadian students with outstanding academic backgrounds as potential researchers.

Jim and Helen Hill Memorial Service Award
Dept. of Electrical and Computer Engineering, UBC *2018*
- The award is given to students who demonstrated leadership through volunteerism.

Trek Excellence Scholarship
University of British Columbia *2017*
- The Scholarships are offered every year to students in the top 5% of their undergraduate year, faculty, and school.

Chancellor's Scholar Award
University of British Columbia *2015*
- Award for students who enter the UBC Vancouver campus with outstanding academic backgrounds.

Teaching Experience

Fall 2020 **CPEN 331: Operating Systems**, Teaching Assistant
Fall 2018 **CPEN 311: Digital Systems Design**, Teaching Assistant

Outreach & Professional Development

Service and Outreach

2017 **UBC Opening and Move-in Day**, Move-in Volunteer
2016 **UBC AMS Bike Kitchen Daily Maintainance**, Bike Repair Volunteer

Professional Memberships

Engineers and Geoscientists BC
